

GeBE-VARIO Box Linerless

GPT-187x5-LL

TECHNICAL INFORMATION

The key advantages at a glance:

- 6" or 4" thermal desktop printer with presenter unit in the housing
- Linerless cutter for full cut for paper thickness 70 – 120 µm
- For paper width 80 – 152 mm and paper roll diameter up to 180 mm
- High quality print of 203/300 dpi with speed up to 250 mm/s
- Integrated power supply for 80 – 264 VAC

The GeBE-VARIO Box Linerless

The thermal printer GeBE-VARIO Box Linerless with linerless cutter and presenter unit is particularly suitable for papers without liner material (linerless). The material of the platen as well as the cutter blade is adhesive-repellent whereby linerless paper is transported and cut off without any problems. The linerless papers are also much more environmentally friendly, as no carrier material has to be disposed of as hazardous waste.

The wide range of available layout commands and several character sizes allow attractive ticket designs.

Using the right paper, the printer can be operated in a temperature range from -10°C to +60°C (14°F to 140°F). Due to the specification for linerless papers, the printer can be used in the following temperature ranges: e.g. for linerless papers with the Hotmelt adhesive in a temperature range from -10°C to +30°C (14°F to 86°F) and for linerless papers with the UV Hotmelt resp. acrylate adhesive in a temperature range from -10°C to +60°C (14°F to 140°F).

Typical applications

- Label printing, e.g. in logistic and retail

Drivers

The printer controller GCT-10610 will be supported by following drivers:

- Windows® 10, 11 and Windows® CE 7.0 (others on request)
- CUPS for Linux Ubuntu 16.04 LTS, 18.04 LTS and 20.04 LTS (others on request)
- SDK for Windows® 10, 11 and Windows® CE 7.0, Android Studio up from version 3.2.1, Linux Ubuntu 16.04 LTS, 18.04 LTS and 20.04 LTS, (others on request)

*) Life cycle according to mechanism testing conditions of the manufacturer with specified paper only. Please inquire. The life cycle of the print head is an averaged expectable performance and no guaranteed data. Under optimum conditions, the above listed data can be achieved using specified paper according to our documentation TI-DE-0879.

**) In case the print head reaches the maximum ambient temperature, the printer will interrupt operation until cooling down and sends an error message.
