Thermal Printers

ENERGY MIRACLE FOR CONTINUOUS OPERATION

With only 300 g, the thermal printer GeBE-FLASH is a light weight. The area of application is mobile outdoor receipt or protocol printing in accounting systems, measuring technologies and logistics.

The printer is amongst others compatible with HP Deskjet and HP 82240B. The easy to handle printer prints on 58 mm paper width. Thanks to Easy Loading Technology changing of paper is a matter of seconds. To aid the compact device GeBE uses a handy paper roll.

The GeBE FLASH operates directly via Bluetooth® from an app for an Android™ Smartphone. This is also possible with an iOS smartphone via the Bluetooth® 4.0 interface. Do you need custom features such as your company colors or logo on the printer? GeBE is more than happy to add these features for you – even at low volumes. Additional accessories such as a belt pouch allow further customization.

An innovative power management controls the energy resources

efficiently which means maximum endurance. Due to the Power Down mode your device stays active with a power draw of nearly 0 mA. Do you want to charge the battery in vehicles? Easy to be done by the 12 V car charger. The mobile usage is guaranteed by a short charging time and long runtime.

The small paper roll allows for 10 m of text, graphics or bar codes. Alternatively, self-adhesive labels can be printed with an eye-pleasing resolution of 203 dpi.

Robust and enduring for trades and industrial applications.

Compact and easy cleaning for recording in lab applications.

- Location independent printing
- App-based control
- Long runtime – short charging time
- Simple configuration
- Time saving paper handling
- Optional customization available starting at small production series

The customized GeBE-FLASH complements the binocular eye-tracking devices from Plusoptix GmbH (as label printer plusoptix P12).

For customization from small quantities on.

Outdoor-suitable

Mobile operation
& low power standby

Controller C32

The GeBE-printers can be charged from a vehicle.

About GeBE

We listen

We will stay in permanent contact to come to a solution together. Reliability, fairness, trust, openness and integrity is the natural basis as to how we do business.

Products, that evolve and improve

Small thermal printers and keyboards of various technologies compose our product focus. Our vast experience with OEM projects enables us to offer a flexible approach to your individual wishes and expectations. Your design – your firmware? We will make our products yours.

All from one source

Sales, development, production, support. You will receive everything from one source, starting with your first inquiry all the way to serial production. We will manufacture in-house and certify per DIN EN ISO 9001, so you receive "Made in Germany" quality. Reliable, long-lasting and at fair terms.

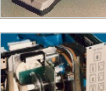

We expand our know-how

Since 1975 we have developed input and output devices including hardware and software. We constantly apply the newest state of technology and our vast knowledge, so we can accompany you through the development of your I/O application.

You produce yourself?

Even if we do not assemble for you, we will still develop your device or product.

Industry Leading Developments

2017	GeBE Linerless Technology for almost residue-free printing and cutting of linerless papers.	
2015	GeBE-PRINTER LAB® for testing hardware in thermal printing systems and thermal papers.	
2012	Intelligent HMI through use of GeBE-INDICO®-Designer GUI.	
2011	First mobile Bluetooth® printer for iPhone®, iPad® and iPod®.	
2004	First 4" panel printer as an alternative to standard DIN A4 desktop printers.	
2001	First panel printer fabricated without screws, with Easy Loading Technology.	
1997	Dot-matrix printer without fixated counter bearing for document printing.	
1994	Prescription printer with paper turn-over unit for two-sided printing. Basic technology for GeBE-MOTION®.	
1990	First battery powered printer for mobile use.	
1989	Cassette printer with dot-matrix technology and paper cutter for thick cards.	
1985	Plotter for labeling of small signs (serial terminals).	
1974	Rotate and swivle-mounting test adapter including bridges for testing purposes.	
1965	Instrument for measurement of hydrated layers in photographic film material.
